

Dr. Marcus Vance

Email: marcus.vance@example.com | Google Scholar: scholar.google.com/citations?user=mvance

Summary:

Machine Learning Scientist with expertise in Natural Language Processing (NLP), Transformer architectures, and recommendation systems.

Technical Skills:

- Machine Learning & NLP: Python, PyTorch, TensorFlow, scikit-learn, spaCy, Transformers, HuggingFace, NLTK
- Data Analysis: pandas, NumPy, SciPy, SQL, Matplotlib, Seaborn, Tableau
- Infrastructure: Docker, AWS, MLflow, Git, Linux, Jupyter

Experience:

Lead ML Engineer | Lexicon Intelligence | 2021 - Present

- Built semantic search and job recommendation engines using Sentence Transformers and cosine similarity metrics.
- Developed custom NER pipelines with spaCy to parse technical skills and certifications from unstructured resumes.
- Evaluated ranking models offline using NDCG@10, Mean Reciprocal Rank (MRR), and Precision@K.

Data Scientist | OmniData Analytics | 2018 - 2021

- Applied scikit-learn classifiers and clustering algorithms to user behavior telemetry.
- Built predictive models in pandas and NumPy to forecast user subscription churn.

Education:

Ph.D. in Computer Science (NLP Focus) | Stanford University | 2014 - 2018
